📍 Jakarta, Indonesia 🌐 LinkedIn 🔗 Portfolio

Technical Product Manager with a Computer Science background and **7 years of experience** bridging engineering, business strategy, and User Experience. Proven track record in **leading end-to-end, company-wide digitalization** initiatives, **leveraging AI tools** to accelerate development velocity. Driven by a **strong sense of ownership and accountability**, adept at translating complex needs into scalable, high-impact digital solutions for global organizations.

Professional Experience

05/2025 – Present
Jakarta, Indonesia

IT & Digital Transformation Assistant Manager, TUV NORD Indonesia

- **Slashed monthly development costs by 60%** for concurrent digital projects by strategically transitioning from high-cost external vendors to an optimized internal model using outsourced talent and AI-assisted development tools.
- **Maximized operational efficiency and data integrity** across 6+ business units by optimizing a portfolio of 15+ digital products, effectively eliminating manual effort and human errors through automated workflows.
- **Achieved a 90% on-time project delivery rate for 10+ annual digital initiatives** by driving high-performing alignment between an agile, cross-functional team of internal developers and external vendors.
- **Enhanced cross-departmental alignment and roadmap predictability** by establishing an ITSM Development module that converted company-wide digitization requests into a structured, prioritized product roadmap.
- **Minimized business disruption and accelerated issue resolution** by deploying an ITSM Operational module that centralized technical support, establishing clear SLAs and full transparency into ticket status and IT performance.
- **Notable Project: Delivered a regional Certification Management System for the Asia region** on time with minimal issues, adapting and enhancing Indonesia's Certification system to bridge regional technological gaps through effective cross-border stakeholder coordination.

02/2024 – 05/2025
South Tangerang,
Indonesia

Product Owner, Treasury (PT Indonesia Logam Pratama)

- **Drove high-velocity product execution** by launching the "Gold for Good" feature within a strict timeline, successfully capturing 12,000+ distinct users and securing over IDR 30 million in donations within 4 months of release.
- **Achieved an 90%+ on-time feature deployment rate** by translating cross-functional business needs into PRDs and leading both internal dev teams and third-party vendors through the full lifecycle from grooming to launch.
- Consistently outperformed KPIs, earning an **'Exceeds Expectations'** performance evaluation.
- **Notable Project: Spearheaded Treasury's market expansion into Singapore** as lead Product PIC, successfully navigating strict regional compliance and cross-functional execution to enable a seamless market entry within deadline and with zero operational disruption.

04/2024 – 05/2025
Remote, Indonesia

Product Manager (Freelance), Hudoro Solusi Digital

- **Accelerated client project kickoffs by 20%** by optimizing the requirement-gathering process into technical specifications and UI/UX validation within tight 2–4 week cycles.
- **Secured repeat client engagements and long-term partnerships** by maintaining a 95% client satisfaction rate through close cross-functional alignment with UI/UX and development teams to guarantee high-quality, seamless product delivery.

06/2023 – 03/2024
Jakarta, Indonesia

Product Development & UI UX Design Tutor (Freelance), Rakamin Academy

- **Achieved a 70%+ portfolio-readiness and project success rate** by mentoring 20+ individuals in digital product management and UX fundamentals through structured, real-world case studies.
- **Elevated mentee competency and adherence to industry best practices** by delivering personalized career guidance and actionable product feedback, resulting in refined, market-ready project work.

12/2021 – 09/2023
Jakarta, Indonesia

Product Researcher, Bukalapak

- **Drove a 90% increase in GMV and enhanced transaction completion rates** by identifying critical pain points via mixed-method research, validating root causes, and delivering data-backed design recommendations.
- **Mitigated product risk and slashed assumption-driven decisions by 40%** by designing and executing end-to-end qualitative and quantitative research, including usability testing and behavioral analysis.
- **Bridged user insights with key business metrics and product objectives** as a strategic partner, ensuring cross-functional alignment across Product, Business, and Design teams to maximize feature adoption.

01/2021 – 12/2021
Jakarta, Indonesia

UX Researcher, Telkom Indonesia

- **Notable Project: Informed the foundational development of a new digital platform** by leading end-to-end ethnographic research that uncovered systemic inefficiencies within the poultry supply chain and delivered high-impact strategic recommendations.
- **Accelerated Research Operations, slashing recruitment lead time by 30% and research cycle time by 20%** while elevating insight quality standards and maintaining strict compliance within 100% of the planned budget.
- **Influenced the product roadmap of multiple Telkom Indonesia digital products** by delivering actionable user insights from discovery to validation that were successfully adopted by cross-functional teams to drive product optimization.

08/2020 – 01/2021
Jakarta, Indonesia

UX Designer, Telkom Indonesia

- **Slashed design and development iteration cycles by 25–30%** by establishing and standardizing early-stage discovery frameworks during the company's digital transformation phase, ensuring structured execution across cross-functional teams.
- **Synchronized user experience enhancements with operational and commercial objectives** for Truck Marketplace & Port digital products, partnering closely with Product, Business, and Design teams to drive product growth and market alignment.

07/2019 – 07/2020
Jakarta, Indonesia

UX Researcher, Warung Pintar

- **Notable Project: Co-created and validated a new product concept alongside C-level executives**, Product, and Sales leaders through a high-impact ethnographic study, delivering strategic opportunity mapping that shaped the product's value proposition and go-to-market direction.
- **Slashed assumption-based feature development by 35%** by validating product hypotheses via mixed-method research (user interviews, usability testing, and behavioral analysis), directly optimizing product prioritization and experimentation roadmaps.

	• Steered data-driven product decisions across Merchant product squads, including Acquisition, Growth, and Transaction, by delivering actionable qualitative and quantitative insights that aligned user needs with squad-specific KPIs.
09/2018 – 03/2019 Jakarta, Indonesia	Research Assistant, UX Indonesia • Accelerated project delivery and data integrity across both external and internal initiatives by providing strategic research support and actionable user insights for multiple client portfolios.
